STORYBOARD

JUNE 2025

Hi John, welcome to this month's issue!

In this edition of Storyboard, discover how visual artist **Chris Psutka** uses the Shinobi II to capture cymatics.

Plus, filmmaker **Orion Phillips II** shares his tips on using the Ninja across a variety of creative projects.

Claim your free 20GB workspace and learn how **ATOMOSphere** makes file sharing simple by watching our video below.

Have you seen our latest product announcements? Check out the brand-new **StudioSonic Shotgun Microphone** - now available for preorder! Plus, the **StudioSonic headphones** are now shipping - order yours today for an unrivalled sound experience!

Finally, don't miss out on our exciting offer! For the month of June only, you can get a **FREE SSD** with any monitor-recorder purchase!

CASE STUDY

Capturing cymatics with Shinobi II

Chris Psutka transforms sound into mesmerizing patterns through cymatics. He explains how using the **Shinobi II** monitor has helped simplify his creative process.

NEW PRODUCT

Introducing the StudioSonic Shotgun Mic

We're excited to announce the StudioSonic Shotgun Mic, a professional-grade wireless/wired shotgun microphone with locking USB-C and full broadcast feature set.

Its dual-mode design offers the flexibility to operate wirelessly over 2.4GHz or via a direct USB-C digital audio connection to ensure a secure, professional-grade link to cameras, monitors, and computers.

The StudioSonic Shotgun Mic caters for a diverse range of scenarios, including on-location interviews, run-and-gun shooting, field reporting, and capturing unscripted dialog. Its high quality 48kHz/24-bit super cardioid design isolates voices with precision, even in noisy environments.

KEY FEATURES

- **Dual Wireless/Wired Modes:** instantly switch between wireless (2.4GHz) and wired (USB-C or 3.5mm analog) with a one-touch toggle
- **Broadcast-grade Audio:** super cardioid condenser capsule with 48kHz/24-bit resolution delivers focused, isolated vocal capture - even in noisy environments
- **Advanced Filtering:** built-in 75Hz & 150Hz cut filters, high-frequency boost, manual gain control
- **OLED Status Display:** real-time visual feedback for gain levels, filter modes, battery status, and more
- **Exceptional Battery Life:** up to 8 hrs in wireless mode, up to 50 hrs wired
- **Ultra-low Latency:** <20ms with range up to 100 meters (line of sight)

The StudioSonic Shotgun Mic is available for pre-order now at USD \$249 (USD \$349 for USA), EUR €249, GBP €215, and AUD \$399, including local sales taxes. Shipping
