

ATOMOS

# STORYBOARD

OCTOBER 2025

---

---

## John, welcome to this month's Storyboard!

This month's Storyboard is all about Atomos in the production chain. The recent news that **DaVinci Resolve now supports ProRes RAW** got us thinking about post-production, and about the fact that it doesn't just start in the edit suite, it begins the moment you turn on your camera.

So we've put together a special web page that walks you through the various stages of production, with real-life examples of how Atomos monitor-recorders play their part. We hope you enjoy it!

Our featured creators this month include photographer **Nathan Armstrong**, who has captured iconic performances for some of the world's biggest artists with Ninja and ProRes RAW at the center of his setup.

Also, Cinematographer **Giorgi Chekurishvili** shares how using Ninja has supported his career path, from filming a school project to shooting global productions.

Don't miss your chance to take advantage of our ATOMOSphere camera-to-cloud offers, they're only available until the end of this month. You can find all the details below.

In product news, the **StudioSonic Shotgun Microphone** is now shipping! Find out more about the full StudioSonic audio range and see how it can bring broadcast-quality sound to any production.

---

#### NEW FEATURE

## Get prepped for post-production

With accurate monitoring, powerful exposure tools, and robust recording formats like ProRes RAW, Atomos helps creators spend less time fixing and more time creating.

To really bring it to life, we're sharing some awesome examples of our customers' work, illustrating how Atomos plays a role in every stage of the journey, from shoot to screen.

Find out more about Atomos' role in post-production, and how we can support your workflow from set to final delivery.

#### CASE STUDY

## From Memphis to the main stage

Music Photographer Nathan Armstrong has captured defining performances for artists like Madonna, Sir Paul McCartney, and Ed Sheeran. At NLA Projects, his team relies on Leica cameras and **Ninja** monitor-recorders to deliver high-impact **ProRes RAW** content with speed and accuracy.

#### CASE STUDY

## Storytelling with Ninja

From filming his school graduation to shooting global artists like Justin Timberlake and Bruno Mars, Giorgi Chekurishvili has built a career with **Ninja** at the center of his workflow. Paired with his RED Komodo 6K, Giorgi uses **ProRes RAW** recording and Ninja's advanced monitoring tools to deliver in any environment.
